Organization - TTC Industrial Area, Navi Mumbai, A Common Effluent Treatment Plant (CETP) at Kopar Khairane - MIDC.

Duration - 1 Month (In plant training)

Projects and Dissertations:

B.Sc. Biotechnology (Entire)

Title: “In Vitro antimicrobial activity and phytochemical screening of *Euphorbia geniculata* species.”

Description:

Leaves of *Euphorbia* species are known to be used in traditional medicine for the treatment of boils, wounds and control of diarrhea and dysentery. There is very limited information available about the medicinal use of *Euphorbia geniculata*. In the present study the ethanol, methanol and aqueous extract of *Euphorbia geniculata* was used to screen the antimicrobial activity against six species of pathogenic organisms from fungi and bacteria. The observed antibacterial activities were believed to be due to the presence of tannins, alkaloids and flavonoids which were identified in the extract.

M.Sc. (Environmental Science)

Title : ‘Study of Carbon Sequestration Potential In Shivaji University, Campus ` Kolhapur’.

Description :

The project aims to ‘Study of Carbon Sequestration Potential In Shivaji University, Campus Kolhapur’. Shivaji University Campus is one of the important wilderness area in Kolhapur city.
